4.0 ★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★ Value for Money 4 ★

The college vibes are good but very dissatisfied with less events in the college.

Placements: The college offers different placements from different companies. Recruiters are Amazon and Cognizant. They provide an average package of 6.17 LPA. The college provides an internship year where you have to do an internship according to your degree.

Infrastructure: The college contains 5-6 libraries where it can be accessed throughout the campus. Wi-Fi is available throughout the campus. Classrooms are kept neat with virtual boards and whiteboards. Inside campus, medical facilities are available where college students get discounts. Canteens are available throughout the campus.

Faculty: The faculty is good and friendly. They are well-qualified. Each of them has a philosophy of doctorate in their respective streams. The curriculum will be upgraded every 5 years according to the industry standards. Students often go for industrial visits for more practicality. Semester exams range from moderate to tough. The pass percentage is 50%.

Other: This course allows me to go for both medical-related and engineering integrated.

3.0 ★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 1 ★ Crowd & Campus Life 3 ★ Value for Money 3 ★

I am dissatisfied because the college rules are the worst.

Placements: AI and ML, along with subjects like data structures, deep learning, reinforcement learning, and natural language processing, are offered. Up to 2,500 students have taken courses in AI and ML, which are based on credits, and students need to complete the required subjects. The packages range from 3 LPA to 10 LPA, but only they show higher figures like 24 LPA. However, these higher packages are offered by Saveetha Engineering College, not Saveetha University.

Infrastructure: The Wi-Fi sometimes connects, but they do not provide the password, so we have to find it ourselves. There are also games and events where we can participate and earn certificates and events where we can play games and win cash or certificates.

Faculty: The average examination is not good. Even if we write the correct answers, we fail most of the time. If we are writing a supplementary exam, we only have a 10% pass percentage. Exams and curriculum are very poor. One day, there will be one rule, and Tomorrow, there will be another. They do not even treat students as humans. They make us feel like robots. It's the worst experience.

Other: Placements are still very low, but they have only just started to come in.

2.8 ★★★★★ Placements 3 ★ Infrastructure 3 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 3 ★ Value for Money 2 ★

It's not satisfactory because of the poor response of management.

Placements: 80 percent of students were placed. Hexaware, TCS, Kaar and Accenture are top recruiters. 59 percent

of students got internships and the minimum number of students got rejected due to poor skills. However, it is good to have these placements; we can have our experience.

Infrastructure: Wifi and college infrastructure is good but hostels are how ever hostels are not quite good in infrastructure and the facilities are not so satisfactory. I can give a 5 out of 10 rating. Cleaning is not good and AC will not work correctly either.

Faculty: The faculty depends on your behavior; if you are good, they are also good; if not, they are also bad but there is partiality among themselves and we should be careful and just study all by ourselves. An outing is not possible. That is the most annoying thing here.

Other: It is not worth it, go to another college.

3.6 ★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 3 ★ Value for Money 3 ★

Good college but little bit stressed.

Placements: Actually, they are providing placements but very less number of people are getting placements. If students have talent in their skills, they will get placements easily, those who are chilling their college life now they are struggling, if we try hard we can get good placements.

Infrastructure: Courses are okay but hostels from 2nd year are rusty. Each room has 12 members and it's very different to live in one room. We have excellent infrastructure and facilities. But the main motive of college is self-learning so we need to learn.

Faculty: Everything is okay. When it comes to curriculum we are having 4 semesters in a year so it's difficult to study and manage this stressful life.

Other: My college life is enjoyable and having good friends is enough to chill the college life.

4.2 ★★★★★ Placements 4 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 4 ★ Value for Money 3 ★

This college is not worthy for good practical skills and developments.

Placements: 60% of students are placed in my course. The highest package in my college is 44 LPA by Amazon. The average package is 6.6 LPA, and the lowest package is 3 LPA. 30% of students from my course got internships. The top recruiting companies are Amazon, Infosys, HCL, etc.

Infrastructure: Classroom facilities are very nice. Every classroom has AC, and the Wi-Fi connection is above average. Library is very neat and clean, with discipline and all the books are available. Mess and canteen are very good. Medical facilities are also available for students. On student ID, they give a discount.

Faculty: The teaching quality for my course is average. Some faculty members at my college do not have teaching skills. They don't even know about the subject. The course curriculum does not make the students industry-ready. The pass percentage for my course is 80%.

Other: My college fest is very nice and enjoyable.

3.0 ★★★★★ Placements 3 ★ Infrastructure 3 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 3 ★ Value for Money 3 ★

This college has atmosphere like schools.

Placements: I'm a 2nd-year student, and almost all students are placed from courses such as CS, IT, and AIDS. Bio-related courses such as bioinformatics and biotechnology placement opportunities are fewer. The placement packages are also low in all courses.

Infrastructure: There are blocks in the university. Few blocks are well maintained, but most of them are not up to standard. Wi-Fi access is only available for CS and IT students. The library consists of a good study area, which is peaceful. There are various canteens inside the campus, so the quality varies for each canteen.

Faculty: A few faculty members are very knowledgeable and helpful, but not all. Not all facilities are easy to access. Many events and programs are organized to develop student's skills. The course curriculum is not that helpful. The exam system is different, but it's easy. Pass percentage is 50%.

Other: I chose SIMATS to pursue this course because bioinformatics in the engineering sector adds value to the certificate. More lab facilities would be helpful at the college. There are no complaints regarding events, fests, or other activities.

4.6 ★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★ Value for Money 5 ★

An excellent review of mine.

Placements: 75% of placements will be provided in our college. The highest package is 44 LPA. The lowest package is 4 LPA. TCS, Amazon, and Infosys visit the college. It is completely based on students' interests whether they will do internships or not. Most of the students are satisfied with our college. Our college is very neat and maintains good discipline, so we are completely satisfied with our college and worth our fee.

Infrastructure: Every facility will be available in our college. Classrooms are there. Every department has good faculty and good Wi-Fi. There is high internet. Labs have almost all the equipment which we need for our classes. Coming to our library, it is a very good place where we can learn and study. Our library is completely a ship theme. Coming to the hostel, it provides both AC and non-AC rooms. Based on the fee structure, we can choose what we want.

Faculty: Almost all faculty members will teach very well. Some of the faculty members are very friendly. They help us to learn from. The curriculum is a little bit confusing for us but this year, they gave a perfect curriculum to follow. This course curriculum makes students industry-ready. Coming to the semester, we have a maximum of 4 subjects for one semester. Per year, 3-4 semesters will take place.

Other: Annually, we have an event called Simam. It is very beautiful and enjoyable with our friends. Every year, we wait for that fest. Our college celebrates Pongal for the whole day on our ground.

One student got placed with a salary package of 55 LPA in 2024.

Placements: Placements are good here. Many MNCs visit the college to hire students. Many students are applying to all companies because of that many members do not get placed. About 70% of students get placed in our college and they are very talented in all programming languages.

Infrastructure: The infrastructure is very good. The library infrastructure is also very good and we cannot see it in any colleges.

Faculty: The teaching is good and the communication with students is also good. Their way of teaching is extremely good. Overall, teachers are well-settled. Teachers are pretty cool and brilliant. Faculty members are very serious at the time of invigilation. Many courses are there to register but for a month, we can register only two subjects, and within a month the semester exam will be completed.
